LOG ON BACK TO LIFE

IN THIS ISSUE

OVERVIEW

A modern phenomenon that has been recorded in recent years is internet addiction Disorder (IAD). Internet addiction is described as an impulse control disorder, which does not involve use of an intoxicating drug and is very similar to pathological gambling. Internet users may enjoy aspects of the Internet that allow them to meet, socialize, and exchange ideas through chat rooms, social networking websites, or "virtual communities."

Internet Addiction Disorder has become one of the main problems that European secondary school students are facing, so our community has to deal with the source of the problem and its impacts which causes the following Short-Term and Long-Term Effects in students who have implications in the educational community:

- Decreased performance in school (educational difficulty) and in many cases early school dropout.
- Emotional Symptoms: anxiety, depression, dishonesty, euphoric feelings when in front of the computer, unable to keep schedules, no sense of time, isolation, defensiveness, avoiding doing work, agitation.
- Physical Symptoms: Backache, headaches, weight gain or loss, disturbances in sleep, carpal tunnel syndrome, blurred or strained vision.

AIMS

Log On Back To Life aims to support project partners in dealing with a horizontal effect for all countries, the Internet Addiction Disorder (IAD). The main priority arises from the contribution of the project to support trainers in tackling the phenomenon of internet addiction.

By creating a more attractive career guidance perspective we are promoting educational quality in teaching in favor of the main actors who are the students. In parallel, we emphasize on the integration of ICT tools in teaching to understand the usefulness of new technologies by the students in a rational way.

The objectives and results of the Log On Back To Life are in line with the priority of the EU for effective investment in quality education and training.

In conclusion, Log On Back To Life will support the early treatment of symptoms that lead to long-term dependence of the internet through prevention and early intervention. Through the material and methodologies will be produced during the project then addressing of the school drop outs phenomenon will be possible by demonstrating to students the positive impact of the Internet and methods to avoid the consequences arising from this.

RESULTS

Record in European level the problem of students' addiction to the use of the Internet and its impact, with the collaboration of different types and responsibilities organization such as: regional primary and secondary directorates, certified training centers, schools, public authorities and expert's institutions

Investigate the levels of secondary education students' addiction to Internet problem aiming to inform and to raise awareness of teachers, structures / training organizations, but especially parents / guardians and secondary school students with the assistance of highly qualified scientists using a specially designed questionnaire by specialized scientists.

Raise public awareness and especially the IAD campaign box to be distributed to schools and directorates informing about the effects of internet addiction through multiple means.

The trainings for teachers will be implemented with the use of Open Educational Resources and E-learning Platform which will be developed under this project the Reference Handbook on Assess, Prevention and Treatment of Internet Addiction to be developed in the framework of our project.

LTT ACTIVITY

TRIKALA/GREECE 18-21 JUNE

2019

Within the scope of "Log On Back To Life Project" supported by the Turkish National Agency within the European Union Education and Youth Programs Erasmus+ KA2 School Education, the LTT Activity was held in Trikala on 18th-21st June, 2019 at the premises of Developmental Center of Thessaly with the attendance of the participants from Governorship of Istanbul (Turkey), Inspectoratul Scolar Județean Iași (Romania) and Università degli Studi di Milano (Italy).

The participants of the LTT Activity were trained in order to become multipliers of this learning process, the use of e-learning platform of the project and the Innovative Cooperative Methodology for the assessment and prevention of internet addiction of Secondary school students.

They will transfer the obtained knowledge and skills to their colleagues that's the secondary school teachers. By this way partnership has created a team of special trainers in each country of the partnership.

At the activity, Log on Back to Life project was presented by Governorship of Istanbul. Participants presented their school and the use of ICT technologies.

Radio spot was developed by the contributions and involvement of all participants. Learning and awareness platform of the project was presented by AKETH. And participants learned how to use the platform effectively. They studied the teaching materials developed for them through the platform.

The proposed Cooperative Methodology for the assessment and prevention of internet addiction of Secondary school students was presented and discussed and feedback was taken from the participants.

PARTNERS

What's next?

- The fifth transnational meeting to be held in Izmir in 18th-19th July, 2019.
- Promotion activities of Awareness and Learning Platform will be discussed with the leadership of AKETH.
